WEDGE WIRE

**MATERIALS FOR WEDGE WIRE
SCREENS**

MATERIALS FOR WEDGE WIRE SCREENS

We use only chromium steels, chromium nickel steels, or titanium for our wedge wire screens.

Our screens can, of course, be equipped, e.g. with frames, flanges, and reinforcements, in other steels as well.

	Material no. EN 10027 T.2
Chromium steels	1.4016, 1.4034 (can be hardened to 55 HRC)
Chromium nickel steels	1.4301, 1.4373, 1.4401, 1.4404, 1.4410, 1.4435, 1.4439, 1.4462, 1.4539, 1.4529, 1.4539, 2.4602, 2.4858
Titanium	3.7025
